Five fine-grid HCT116 diagonal-narrowing candidates

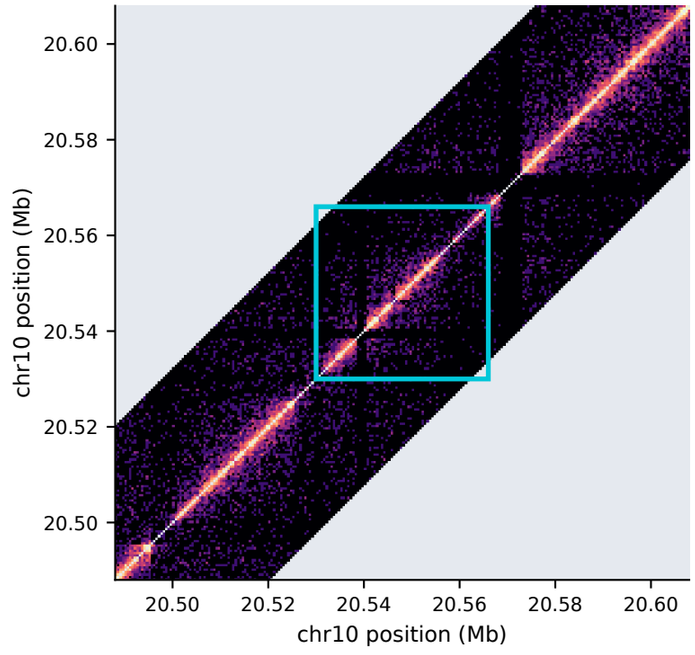

R1: chr10:20,258,500-20,336,000
minimum W80 = 7 kb | score = 0.280

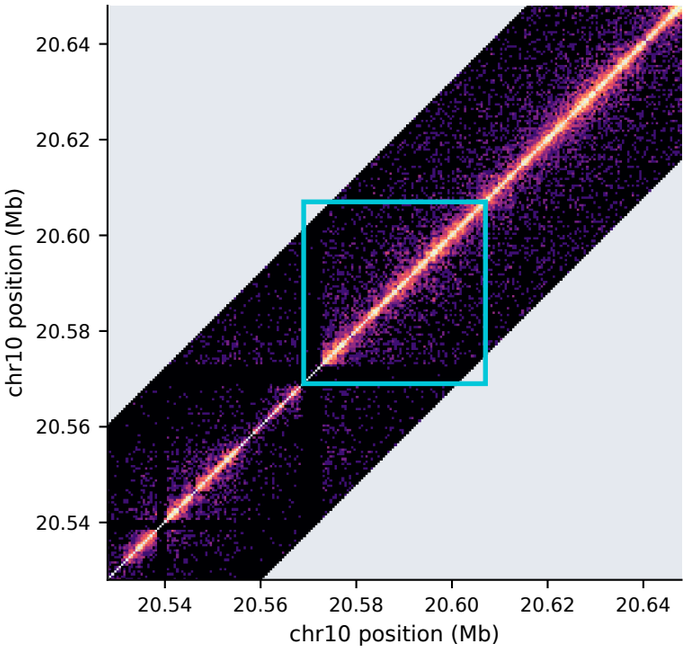

R2: chr10:20,427,000-20,459,500
minimum W80 = 7 kb | score = 0.280

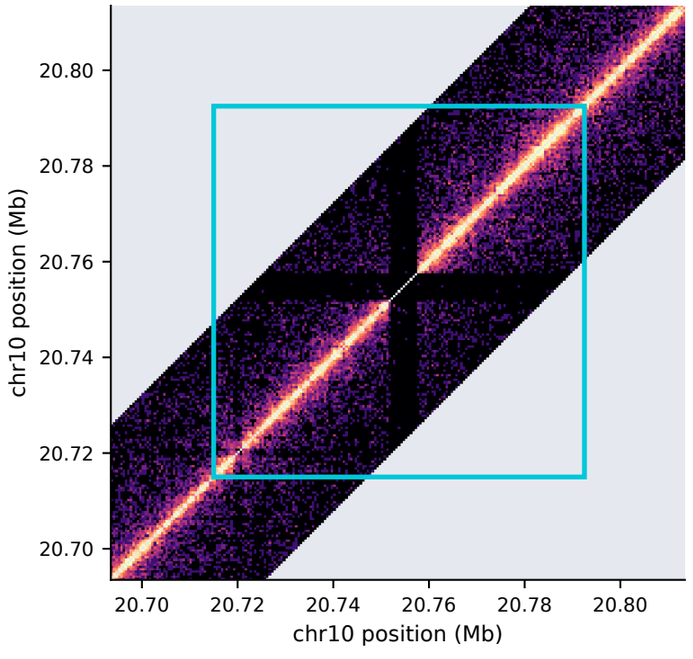

R3: chr10:20,530,000-20,566,000
minimum W80 = 7 kb | score = 0.280

R4: chr10:20,569,000-20,607,000
minimum W80 = 7 kb | score = 0.280

R5: chr10:20,715,000-20,792,500
minimum W80 = 6.5 kb | score = 0.387

Reading these figures

Cyan squares:
Merged detector footprints

Heatmap:
Real, unnormalized HCT116 contacts
within the 32-kb extracted band

Gray regions:
Unrepresented contact separations

Input resolution: 500 bp
Measurement window: 32 kb
Scan step: 500 bp

These are exploratory detections.
They are not precise boundaries.
Formal genomic QC is pending.
